To Whom It May Concern,

It is my pleasure to recommend **Patryk McGlynn**, whom I had the privilege of teaching in IB Mathematics: Analysis and Approaches Higher Level during his 11th grade year (2023–2024) at the **American School of Valencia**. Although I am no longer teaching at ASV, I remember Patryk distinctly for his intellectual curiosity, positive attitude, and genuine enthusiasm for learning mathematics at a high level.

From the very first weeks of the course, Patryk demonstrated a deep understanding of abstract mathematical concepts and a remarkable ability to apply them to challenging problems. His questions often went beyond the syllabus, reflecting a genuine curiosity and a strong desire to explore the "why" behind each idea. He consistently excelled on assessments, submitted thorough homework on time, and was always dependable in meeting deadlines. Patryk also supported and collaborated effectively with his classmates, contributing to a positive and engaging learning environment.

Beyond his academic performance, Patryk was actively involved in school life. He was a dedicated member of the basketball team, representing the school in several tournaments, participated in Model United Nations (MUN)**,** and engaged in business startup projects**,** showcasing his initiative and leadership skills. His maturity, motivation, and enthusiasm made him a true pleasure to teach.

I have no doubt that Patryk will bring the same commitment, analytical ability, and passion for learning to his future academic endeavors. He is the kind of student who not only thrives in rigorous academic settings but also elevates the learning experience of those around him.

Please feel free to contact me at masouda@internationalsf.org if you would like any further information about his performance or character.

Sincerely,
Masoud Askarbabaei
